Safety Data Sheet: Calcium Hypochlorite

1. Identification

Product	Calcium Hypochlorite; CAS 7778-54-3; EC 231-908-7
Use	Oxidizing chlorine source for professional water-treatment and industrial disinfection formulations.
Company	Hainan Zhongxin Chemical Co., Ltd. (ZXCHEM)
Address	Room 1001, Building A, Caohejing Center, No. 1520 Gumei Road, Xuhui District, Shanghai, China
Telephone / email	+86-21-54265599 / sales@zxchem.com.cn
Emergency contact	ZXCHEM office number above, office hours, China time (UTC+8). For urgent medical assistance contact local emergency services.
Scope	Reference safety information for Calcium Hypochlorite. The reference composition, concentration and supply-grade differences are described in Section 3. This document does not certify the composition or transport status of a specific delivered batch or a different formulation.

2. Hazards Identification

Classification	Strong oxidizing solid; harmful ingestion; corrosive contact and severe eye injury; aquatic hazard.
Signal word / symbols	Danger; GHS03, GHS05, GHS07, GHS09
Hazard statements	H272: oxidizing fire hazard. H302: harmful ingestion. H314/H318: chemical burns and serious eye injury. H400/H410: acute and persistent aquatic toxicity. Acid contact may release toxic chlorine.
Prevention	Use adequate ventilation; avoid inhaling dust. Prevent skin and eye contact. Wear suitable chemical-resistant gloves and eye protection. Wash after handling; keep food and drink out of the work area.
Response	After exposure, stop work and seek medical advice. For severe exposure obtain urgent medical care. Rinse contaminated skin or eyes with water; move an inhalation casualty to fresh air.
Environment	Prevent uncontrolled release to drains, soil or surface water. Collect spills for appropriate disposal.

3. Composition / Information on Ingredients

Reference ingredient	Calcium hypochlorite, CAS 7778-54-3; reference available chlorine 65%. Commercial hydrated solid with water and inorganic salts; UN2880 applies to the indicated hydrated grade.
Supply grade	Available chlorine ≥ 65%
Applicability	The cited concentration or purity describes the reference material. It is not a certificate of analysis for the delivered batch; different solvents or dilutions require the matching supplier safety document.

4. First-Aid Measures

General	Protect the rescuer from exposure and show the product information to medical personnel. Obtain medical advice if symptoms occur or exposure is significant.
Inhalation	Move to fresh air and keep the person comfortable. Seek medical care for breathing difficulty or persistent symptoms. Avoid exposing rescuers to dust.
Skin	Remove contaminated clothing and rinse skin thoroughly with water. Obtain urgent treatment for chemical burns.
Eyes	Rinse gently with clean water for at least 15 minutes. Remove contact lenses when easy and continue rinsing. Obtain urgent medical care.
Ingestion	Rinse the mouth. Do not induce vomiting. Give nothing by mouth to an unconscious person. Obtain emergency medical attention.
Effects / treatment	Chemical burns and serious eye injury; harmful ingestion and respiratory irritation from dust or chlorine release. Treatment is symptomatic and directed by a clinician.

5. Fire-Fighting Measures

Extinguishing media	Use abundant water spray from a protected position to cool material and exposed containers. Avoid ammonium-containing dry extinguishers; prevent contaminated runoff.
Hazards	Heating or incompatible contact can release oxygen and chlorine-containing gases.
Protection	Firefighters require suitable protective clothing and self-contained breathing equipment. Prevent contaminated firefighting water entering drains.

6. Accidental Release Measures

Personnel	Isolate the spill and provide ventilation. Use chemical-resistant gloves and eye protection; avoid contact and dust exposure.
Environment	Contain the release and protect drains and waterways. Report significant environmental contamination to the responsible authority.
Cleanup	Collect spilled solid without raising dust into closed labelled containers.

7. Handling and Storage

Handling	Use controlled transfer and effective ventilation. Avoid generating dust and prevent contamination of the work area.
Storage	Store cool, dry and well ventilated, away from acids, reducing agents, organic materials, heat, moisture and contamination.
Incompatibilities	Acids, ammonia, amines, reducing agents, organic materials and combustibles. Prevent contamination and unnecessary heating.
Specific use	Evaluate compatibility and appropriate operating conditions in the complete formulation before industrial use.

8. Exposure Controls / Personal Protection

Exposure limits	No product-specific occupational exposure limit is established in this reference compilation. Apply applicable local workplace requirements.
Engineering controls	Use local extraction where dust can be generated. Maintain accessible eyewash and emergency washing facilities.
Personal protection	Wear chemical-resistant gloves selected for the task, suitable protective clothing and splash goggles. Add face protection for splash-prone tasks.
Respiratory protection	Use a properly selected respirator under a respiratory-protection program where engineering controls do not adequately limit airborne exposure.
Hygiene	Wash after handling, remove contaminated clothing promptly and do not eat, drink or smoke in the work area.

9. Physical and Chemical Properties

Appearance	White to pale yellow granules or powder
Formula / molecular weight	Ca(ClO)2 / 142.98 g/mol (active)
Other properties	Product-specific values for odor threshold, vapor pressure, partition coefficient, autoignition temperature and viscosity are not supplied by the selected reference set. No values are inferred.

10. Stability and Reactivity

Stability	Handle and store under the recommended conditions. Prevent contamination and unnecessary heating.
Incompatibilities	Acids, ammonia, amines, reducing agents, organic materials and combustibles. Prevent contamination and unnecessary heating.
Decomposition	Heating or incompatible contact can release oxygen and chlorine-containing gases.

11. Toxicological Information

Exposure effects	Chemical burns and serious eye injury; harmful ingestion and respiratory irritation from dust or chlorine release.
Reference classification	Strong oxidizing solid; harmful ingestion; corrosive contact and severe eye injury; aquatic hazard.
Data limits	No product-specific numerical toxicity or reproductive-effect study values are asserted by this compilation. Use the matched manufacturer data for a detailed assessment.

12. Ecological Information

Environmental effects	Highly toxic to aquatic organisms; prevent contaminated runoff and uncontrolled environmental release.
Controls	Prevent uncontrolled release, collect spills and dispose of contaminated material through an authorized route.
Assessment	No product-specific PBT/vPvB assessment is claimed. Absence of data does not establish absence of environmental effects.

13. Disposal Considerations

Product	Collect surplus product and contaminated cleanup material for disposal by an authorized chemical-waste contractor in accordance with local requirements.
Packaging	Containers may retain product residues. Do not reuse contaminated packaging without an approved cleaning process; use an authorized disposal route.

14. Transport Information

Classification	Class 5.1 — Oxidizer
UN number	UN 2880
Shipping name	CALCIUM HYPOCHLORITE, HYDRATED, or CALCIUM HYPOCHLORITE, HYDRATED MIXTURE (5.5–16% water)
Class / packing group	Class 5.1 / Packing Group II
Transport precautions	Protect packaging and closures from damage, secure loads and prevent releases. This reference is not a shipping declaration for a specific consignment.

15. Regulatory Information

Identity	Calcium Hypochlorite; CAS 7778-54-3; EC 231-908-7
HS reference	282810; reference heading rather than a destination customs ruling.
Compliance	Apply applicable workplace, environmental and transport rules. A raw-material listing does not establish authorization for a finished disinfectant or biocidal product.
Assessment	No ZXCHEM-specific chemical safety assessment or destination registration is asserted.

16. Other Information

Hazard meanings	H272: oxidizing fire hazard. H302: harmful ingestion. H314/H318: chemical burns and serious eye injury. H400/H410: acute and persistent aquatic toxicity. Acid contact may release toxic chlorine.
Limitations	Prepared as reference safety information for the identified material. It is not a batch analytical certificate or safety assessment of a different solvent-containing formulation.
Revision	2026.2; prepared 2026-10-06. Customer-document branding and title corrected; technical safety data retained.
Document scope	Reference safety information for the material and grade described in Sections 1 and 3. Different concentrations, solvents or formulations require the applicable safety information. This is not a batch analytical certificate.

Revision: 2026.2 | Revision date: 2026-10-06
