

Safety Data Sheet: Bemotrizinol

1. Identification

Product	Bemotrizinol; CAS 187393-00-6; EC 425-950-7
Use	Professional personal-care ingredient and formulation development.
Company	Hainan Zhongxin Chemical Co., Ltd. (ZXCHEM)
Address	Room 1001, Building A, Caohejing Center, No. 1520 Gumei Road, Xuhui District, Shanghai, China
Telephone / email	+86-21-54265599 / sales@zxchem.com.cn
Emergency contact	ZXCHEM office number above, office hours, China time (UTC+8). For urgent medical assistance contact local emergency services.
Scope	Reference safety information for Bemotrizinol. The reference composition, concentration and supply-grade differences are described in Section 3. This document does not certify the composition or transport status of a specific delivered batch or a different formulation.

2. Hazards Identification

Classification	Not classified as hazardous under the selected CLP substance reference.
Signal word / symbols	No signal word assigned; No GHS pictogram in the selected reference
Hazard statements	No classified GHS hazard statement; dispersed organic dust can form an ignitable cloud.
Prevention	Use adequate ventilation; avoid inhaling dust. Prevent skin and eye contact. Wear suitable chemical-resistant gloves and eye protection. Wash after handling; keep food and drink out of the work area.
Response	After exposure, stop work and seek medical advice. For severe exposure obtain urgent medical care. Rinse contaminated skin or eyes with water; move an inhalation casualty to fresh air.
Environment	Prevent uncontrolled release to drains, soil or surface water. Collect spills for appropriate disposal.

3. Composition / Information on Ingredients

Reference ingredient	Bemotrizinol, CAS 187393-00-6, EC 425-950-7. Supply assay ≥98%; no unverified impurity composition is assigned.
Supply grade	Assay ≥98% (HPLC)
Applicability	The cited concentration or purity describes the reference material. It is not a certificate of analysis for the delivered batch; different solvents or dilutions require the matching supplier safety document.

4. First-Aid Measures

General	Protect the rescuer from exposure and show the product information to medical personnel. Obtain medical advice if symptoms occur or exposure is significant.
Inhalation	Move to fresh air and keep the person comfortable. Seek medical care for breathing difficulty or persistent symptoms. Avoid exposing rescuers to dust.
Skin	Remove contaminated clothing and rinse skin thoroughly with water. Seek medical advice for persistent irritation.
Eyes	Rinse gently with clean water for at least 15 minutes. Remove contact lenses when easy and continue rinsing. Seek medical advice if irritation persists.
Ingestion	Rinse the mouth. Do not induce vomiting. Give nothing by mouth to an unconscious person. Obtain medical advice.
Effects / treatment	Avoid uncontrolled dust, mist, skin and eye exposure. Obtain medical advice for persistent symptoms. Treatment is symptomatic and directed by a clinician.

5. Fire-Fighting Measures

Extinguishing media	Use water spray, foam or dry powder. The substance reference identifies carbon dioxide as unsuitable.
Fire hazards	Heating can generate harmful vapours and nitrogen oxides; avoid ignition of fine dust.
Firefighters	Wear self-contained breathing apparatus and protective firefighting clothing; retain contaminated extinguishing water.

6. Accidental Release Measures

Personnel	Isolate the spill and provide ventilation. Use chemical-resistant gloves and eye protection; avoid contact and dust exposure.
Environment	Contain the release and protect drains and waterways. Report significant environmental contamination to the responsible authority.
Cleanup	Collect spilled solid without raising dust into closed labelled containers.

7. Handling and Storage

Handling	Provide ventilation and local dust extraction during powder transfer. Wear suitable gloves, work clothing and safety goggles; avoid airborne dust, ingestion and environmental release.
Storage	Store tightly closed in a cool, dry place protected from light. Keep away from excessive heat, sparks and open flames; prevent airborne dust clouds.
Incompatibilities	No specific incompatible substance is identified in the selected reference; prevent reactive contamination.

8. Exposure Controls / Personal Protection

Exposure limits	No product-specific occupational exposure limit is established here. Control airborne dust and apply current local workplace exposure requirements.
Engineering controls	Use local extraction where dust can be generated. Maintain accessible eyewash and emergency washing facilities.
Personal protection	Wear chemical-resistant gloves selected for the task, suitable protective clothing and splash goggles. Add face protection for splash-prone tasks.
Respiratory protection	Use a properly selected respirator under a respiratory-protection program where engineering controls do not adequately limit airborne exposure.
Hygiene	Wash after handling, remove contaminated clothing promptly and do not eat, drink or smoke in the work area.

9. Physical and Chemical Properties

Appearance	Yellowish powder
Melting range, reference	80.3–80.5°C
Flash point, reference	284°C
Water solubility, reference	<0.014 mg/L at 20°C
Additional properties	Other unstated supplied-grade physicochemical values are not inferred.

10. Stability and Reactivity

Stability	Handle and store under the recommended conditions. Prevent contamination and unnecessary heating.
Incompatibilities	No specific incompatible substance is identified in the selected reference; prevent reactive contamination.
Decomposition	Fire can release harmful vapours and nitrogen oxides.

11. Toxicological Information

Exposure effects	Avoid uncontrolled dust, mist, skin and eye exposure. Obtain medical advice for persistent symptoms.
Reference classification	Not classified as hazardous under the selected CLP substance reference.
Toxicological data	Reference rat oral and dermal LD50 values exceed 5000 mg/kg. The cited animal studies did not identify skin/eye irritation or sensitization; these results are not supplied-batch tests.

12. Ecological Information

Environmental effects	Reference fish LC50 (96 h), Daphnia EC50 (48 h) and algal EC50 (72 h) exceed 100 mg/L. Biodegradation was <10% after 28 days: not readily biodegradable. Prevent release to water.
Controls	Prevent uncontrolled release, collect spills and dispose of contaminated material through an authorized route.
Assessment	No product-specific PBT/vPvB assessment is claimed. Absence of data does not establish absence of environmental effects.

13. Disposal Considerations

Product	Collect surplus product and contaminated cleanup material for disposal by an authorized chemical-waste contractor in accordance with local requirements.
Packaging	Containers may retain product residues. Do not reuse contaminated packaging without an approved cleaning process; use an authorized disposal route.

14. Transport Information

Classification	Non-dangerous goods
UN number	Not assigned
Shipping name	Not regulated as dangerous goods
Class / packing group	ADR, RID, ADN, IMDG and IATA/ICAO: non-dangerous goods in the full solid reference.
Transport precautions	Protect packaging and closures from damage, secure loads and prevent releases. This reference is not a shipping declaration for a specific consignment.

15. Regulatory Information

Identity	Bemotrizinol; CAS 187393-00-6; EC 425-950-7
HS reference	293369; reference heading rather than a destination customs ruling.
Compliance	Apply applicable workplace, environmental and transport rules. A raw-material listing does not establish finished-product authorization.
Assessment	No ZXCHEM-specific chemical safety assessment or destination registration is asserted.

16. Other Information

Hazard meanings	No classified GHS hazard statement; dispersed organic dust can form an ignitable cloud.
Limitations	Prepared as reference safety information for the identified material. It is not a batch analytical certificate or safety assessment of a different solvent-containing formulation.
Revision	2026.2; prepared 2026-10-06. Customer-document branding and title corrected; technical safety data retained.
Document scope	Reference safety information for the material and grade described in Sections 1 and 3. Different concentrations, solvents or formulations require the applicable safety information. This is not a batch analytical certificate.

Revision: 2026.2 | Revision date: 2026-10-06
