

Safety Data Sheet: Ethylene Glycol Diglycidyl Ether (EGDGE)

1. Identification

Product	Ethylene Glycol Diglycidyl Ether (EGDGE); CAS 2224-15-9; EC 218-746-2
Use	Industrial polymer additive and formulation development.
Company	Hainan Zhongxin Chemical Co., Ltd. (ZXCHEM)
Address	Room 1001, Building A, Caohejing Center, No. 1520 Gumei Road, Xuhui District, Shanghai, China
Telephone / email	+86-21-54265599 / sales@zxchem.com.cn
Emergency contact	ZXCHEM office number above, office hours, China time (UTC+8). For urgent medical assistance contact local emergency services.
Scope	Reference safety information for Ethylene Glycol Diglycidyl Ether (EGDGE). The reference composition, concentration and supply-grade differences are described in Section 3. This document does not certify the composition or transport status of a specific delivered batch or a different formulation.

2. Hazards Identification

Classification	Acute oral toxicity Category 4; skin irritation Category 2; eye irritation Category 2; skin sensitization Category 1; germ-cell mutagenicity Category 2.
Signal word / symbols	Warning; GHS07, GHS08
Hazard statements	H302: harmful if swallowed. H315: irritates skin. H319: causes serious eye irritation. H317: may cause an allergic skin reaction. H341: suspected of causing genetic defects.
Prevention	Use adequate ventilation; avoid inhaling mist. Prevent skin and eye contact. Wear suitable chemical-resistant gloves and eye protection. Wash after handling; keep food and drink out of the work area.
Response	After exposure, stop work and seek medical advice. For severe exposure obtain urgent medical care. Rinse contaminated skin or eyes with water; move an inhalation casualty to fresh air.
Environment	Prevent uncontrolled release to drains, soil or surface water. Collect spills for appropriate disposal.

3. Composition / Information on Ingredients

Reference ingredient	Ethylene glycol diglycidyl ether technical grade, CAS 2224-15-9. Local EEW 126–135 g/eq. Neither reference establishes the delivered-batch impurity profile.
Supply grade	EEW 126–135 g/eq
Applicability	The cited concentration or purity describes the reference material. It is not a certificate of analysis for the delivered batch; different solvents or dilutions require the matching supplier safety document.

4. First-Aid Measures

General	Protect the rescuer from exposure and show the product information to medical personnel. Obtain medical advice if symptoms occur or exposure is significant.
Inhalation	Move to fresh air and keep the person comfortable. Seek medical care for breathing difficulty or persistent symptoms. Avoid exposing rescuers to mist.
Skin	Remove contaminated clothing and rinse skin thoroughly with water. Seek medical advice for persistent irritation.
Eyes	Rinse gently with clean water for at least 15 minutes. Remove contact lenses when easy and continue rinsing. Seek medical advice if irritation persists.
Ingestion	Rinse the mouth. Do not induce vomiting. Give nothing by mouth to an unconscious person. Obtain medical advice.
Effects / treatment	Liquid contact presents irritation and sensitization hazards; avoid ingestion and exposure to the suspected mutagen. Treatment is symptomatic and directed by a clinician.

5. Fire-Fighting Measures

Extinguishing media	Use water spray, foam, dry chemical or carbon dioxide suited to the surrounding fire.
Hazards	Overheating and fire can produce carbon oxides.
Protection	Firefighters require suitable protective clothing and self-contained breathing equipment. Prevent contaminated firefighting water entering drains.

6. Accidental Release Measures

Personnel	Isolate the spill and provide ventilation. Use chemical-resistant gloves and eye protection; avoid contact and mist exposure.
Environment	Contain the release and protect drains and waterways. Report significant environmental contamination to the responsible authority.
Cleanup	Stop the leak if safe. Absorb liquid with a compatible inert material and collect in closed labelled containers. Do not wash into drains.

7. Handling and Storage

Handling	Use controlled transfer and local ventilation where mist can form. Wear compatible chemical-resistant gloves, splash goggles and protective clothing; avoid contact with uncured epoxy liquid.
Storage	Keep tightly closed in a cool, dry, ventilated area away from sunlight and heat. Separate from oxidizers, strong acids and uncontrolled contact with curing agents.
Incompatibilities	Oxidizers, strong acids, bases and uncontrolled amine-curing-agent contact.

8. Exposure Controls / Personal Protection

Exposure limits	No product-specific occupational limit is established here. Control transfer mist and apply current local workplace exposure requirements.
Engineering controls	Use local extraction where mist can be generated. Maintain accessible eyewash and emergency washing facilities.
Personal protection	Wear chemical-resistant gloves selected for the task, suitable protective clothing and splash goggles. Add face protection for splash-prone tasks.
Respiratory protection	Use a properly selected respirator under a respiratory-protection program where engineering controls do not adequately limit airborne exposure.
Hygiene	Wash after handling, remove contaminated clothing promptly and do not eat, drink or smoke in the work area.

9. Physical and Chemical Properties

Appearance	Colorless transparent liquid
Formula / molecular weight	C8H14O4 / 174.20 g/mol
Appearance	Colorless transparent liquid
Viscosity at 25°C, supply	15–30 mPa·s
Epoxide equivalent, supply	126–135 g/eq
Other properties	Product-specific values for odor threshold, vapor pressure, partition coefficient, autoignition temperature and viscosity are not supplied by the selected reference set. No values are inferred.

10. Stability and Reactivity

Stability	Handle and store under the recommended conditions. Prevent contamination and unnecessary heating.
Incompatibilities	Oxidizers, strong acids, bases and uncontrolled amine-curing-agent contact.
Decomposition	Overheating and fire can produce carbon oxides.

11. Toxicological Information

Exposure effects	Liquid contact presents irritation and sensitization hazards; avoid ingestion and exposure to the suspected mutagen.
Reference classification	Acute oral toxicity Category 4; skin irritation Category 2; eye irritation Category 2; skin sensitization Category 1; germ-cell mutagenicity Category 2.
Toxicological data	The reference does not provide complete numerical acute or chronic toxicity data for the supplied grade. No absence of effects is inferred.

12. Ecological Information

Environmental effects	Prevent discharge to soil, drains and receiving water. Retain cleanup waste; the reference does not establish complete environmental fate data for the supplied grade.
Controls	Prevent uncontrolled release, collect spills and dispose of contaminated material through an authorized route.
Assessment	No product-specific PBT/vPvB assessment is claimed. Absence of data does not establish absence of environmental effects.

13. Disposal Considerations

Product	Collect surplus product and contaminated cleanup material for disposal by an authorized chemical-waste contractor in accordance with local requirements.
Packaging	Containers may retain product residues. Do not reuse contaminated packaging without an approved cleaning process; use an authorized disposal route.

14. Transport Information

Classification	Non-dangerous goods
UN number	Not assigned
Shipping name	Not regulated as dangerous goods
Class / packing group	ADR/RID, IMDG and IATA: non-dangerous goods in the full Wako same-CAS liquid reference. section 14 gives no transport assignment.
Transport precautions	Protect packaging and closures from damage, secure loads and prevent releases. This reference is not a shipping declaration for a specific consignment.

15. Regulatory Information

Identity	Ethylene Glycol Diglycidyl Ether (EGDGE); CAS 2224-15-9; EC 218-746-2
HS reference	291090; reference heading rather than a destination customs ruling.
Compliance	Apply applicable workplace, environmental and transport rules. A raw-material listing does not establish finished-product authorization.
Assessment	No ZXCHEM-specific chemical safety assessment or destination registration is asserted.

16. Other Information

Hazard meanings	H302: harmful if swallowed. H315: irritates skin. H319: causes serious eye irritation. H317: may cause an allergic skin reaction. H341: suspected of causing genetic defects.
Limitations	Prepared as reference safety information for the identified material. It is not a batch analytical certificate or safety assessment of a different solvent-containing formulation.
Revision	2026.3; prepared 2026-10-06. Customer-document branding and title corrected; technical safety data retained.
Document scope	Reference safety information for the material and grade described in Sections 1 and 3. Different concentrations, solvents or formulations require the applicable safety information. This is not a batch analytical certificate.

Revision: 2026.3 | Revision date: 2026-10-06
