

Safety Data Sheet: Sodium Copper Chlorophyllin

1. Identification

Product	Sodium Copper Chlorophyllin; CAS 11006-34-1 (sodium-salt reference); EC 234-242-5
Use	Professional colour and ingredient formulation development, with a suitably qualified grade for the intended application.
Company	Hainan Zhongxin Chemical Co., Ltd. (ZXCHEM)
Address	Room 1001, Building A, Caohejing Center, No. 1520 Gumei Road, Xuhui District, Shanghai, China
Telephone / email	+86-21-54265599 / sales@zxchem.com.cn
Emergency contact	ZXCHEM office number above, office hours, China time (UTC+8). For urgent medical assistance contact local emergency services.
Scope	Reference safety information for Sodium Copper Chlorophyllin. The reference composition, concentration and supply-grade differences are described in Section 3. This document does not certify the composition or transport status of a specific delivered batch or a different formulation.

2. Hazards Identification

Classification	Not classified as hazardous under the selected OSHA/GHS powder reference.
Signal word / symbols	No signal word assigned; No GHS pictogram in the selected reference
Hazard statements	No classified H-code assigned; airborne powder and direct contact can irritate eyes, skin and airways.
Prevention	Use adequate ventilation; avoid inhaling dust. Prevent skin and eye contact. Wear suitable chemical-resistant gloves and eye protection. Wash after handling; keep food and drink out of the work area.
Response	After exposure, stop work and seek medical advice. For severe exposure obtain urgent medical care. Rinse contaminated skin or eyes with water; move an inhalation casualty to fresh air.
Environment	Prevent uncontrolled release to drains, soil or surface water. Collect spills for appropriate disposal.

3. Composition / Information on Ingredients

Reference ingredient	Water-soluble sodium copper chlorophyllin preparation; CAS 11006-34-1 is the matched reference identity. The supplied botanical composition is not verified by the reference 100% ingredient declaration.
Supply grade	Water-soluble green colour preparation
Applicability	The cited concentration or purity describes the reference material. It is not a certificate of analysis for the delivered batch; different solvents or dilutions require the matching supplier safety document.

4. First-Aid Measures

Inhalation	Move to fresh air. Obtain medical advice after significant exposure or respiratory symptoms.
Skin	Remove contaminated clothing and wash thoroughly with soap and water; obtain advice for continuing irritation.
Eyes	Rinse gently with clean water for at least 15 minutes and obtain medical advice for persistent symptoms.
Ingestion	Rinse the mouth. Do not induce vomiting without medical advice. Give nothing orally to an unconscious person; seek medical advice.

5. Fire-Fighting Measures

Extinguishing media	Use water spray, foam, dry chemical or carbon dioxide suited to the surrounding fire.
Hazards	Fire or severe heating can release irritating decomposition fumes; use appropriate respiratory protection.
Protection	Firefighters require suitable protective clothing and self-contained breathing equipment. Prevent contaminated firefighting water entering drains.

6. Accidental Release Measures

Personnel	Isolate the spill and provide ventilation. Use chemical-resistant gloves and eye protection; avoid contact and dust exposure.
Environment	Contain the release and protect drains and waterways. Report significant environmental contamination to the responsible authority.
Cleanup	Collect spilled solid without raising dust into closed labelled containers.

7. Handling and Storage

Handling	Use local dust extraction, compatible chemical gloves, work clothing and goggles. Avoid dust clouds and ignition sources; maintain eyewash facilities.
Storage	Keep sealed in a cool, dry, ventilated place protected from light. Separate from oxidizers and protect against moisture and contamination.
Incompatibilities	Strong oxidizing agents.

8. Exposure Controls / Personal Protection

Exposure limits	The reference cites an ACGIH copper-compound TWA of 1 mg/m ³ as Cu. Check current local occupational requirements and use appropriate exposure controls.
Engineering controls	Use local extraction where dust can be generated. Maintain accessible eyewash and emergency washing facilities.
Personal protection	Wear chemical-resistant gloves selected for the task, suitable protective clothing and splash goggles. Add face protection for splash-prone tasks.
Respiratory protection	Use a properly selected respirator under a respiratory-protection program where engineering controls do not adequately limit airborne exposure.
Hygiene	Wash after handling, remove contaminated clothing promptly and do not eat, drink or smoke in the work area.

9. Physical and Chemical Properties

Appearance, supply	Dark-green powder
Solubility, supply	Water soluble
pH, supply	9.5–10.7
Additional properties	No unstated delivered-grade physicochemical values are inferred.

10. Stability and Reactivity

Stability	Handle and store under the recommended conditions. Prevent contamination and unnecessary heating.
Incompatibilities	Strong oxidizing agents.
Decomposition	Fire or severe heating can release irritating decomposition fumes; use appropriate respiratory protection.

11. Toxicological Information

Exposure effects	Control dust or mist exposure and obtain medical advice after significant exposure or persistent symptoms.
Reference classification	Not classified as hazardous under the selected OSHA/GHS powder reference.
Toxicological data	The source does not provide quantitative acute or chronic toxicity values. Dust and contact irritation are possible; absence of classification is not proof of harmlessness.

12. Ecological Information

Environmental effects	No adequate numerical aquatic or environmental-fate dataset is established. Retain spills and cleaning water; prevent discharge.
Controls	Prevent uncontrolled release, collect spills and dispose of contaminated material through an authorized route.
Assessment	No product-specific PBT/vPvB assessment is claimed. Absence of data does not establish absence of environmental effects.

13. Disposal Considerations

Product	Collect surplus product and contaminated cleanup material for disposal by an authorized chemical-waste contractor in accordance with local requirements.
Packaging	Containers may retain product residues. Do not reuse contaminated packaging without an approved cleaning process; use an authorized disposal route.

14. Transport Information

Classification	Non-dangerous goods
UN number	Not assigned
Shipping name	Not regulated as dangerous goods
Class / packing group	DOT, TDG, ADR, RID, IMDG, ICAO and IATA: non-dangerous goods in the full powder reference. No UN number or transport class assigned.
Transport precautions	Protect packaging and closures from damage, secure loads and prevent releases. This reference is not a shipping declaration for a specific consignment.

15. Regulatory Information

Identity	Sodium Copper Chlorophyllin; CAS 11006-34-1 (sodium-salt reference); EC 234-242-5
HS reference	320300; reference heading rather than a destination customs ruling.
Compliance	Apply applicable workplace, environmental and transport rules. A raw-material listing does not establish finished-product authorization.
Assessment	No ZXCHEM-specific chemical safety assessment or destination registration is asserted.

16. Other Information

Hazard meanings	No classified H-code assigned; airborne powder and direct contact can irritate eyes, skin and airways.
Limitations	Prepared as reference safety information for the identified material. It is not a batch analytical certificate or safety assessment of a different solvent-containing formulation.
Revision	2026.4; prepared 2026-10-07. Customer-document branding and title corrected; technical safety data retained.
Document scope	Reference safety information for the material and grade described in Sections 1 and 3. Different concentrations, solvents or formulations require the applicable safety information. This is not a batch analytical certificate.

Revision: 2026.4 | Revision date: 2026-10-07
