

Safety Data Sheet: Tomato Lycopene

1. Identification

Product	Tomato Lycopene; CAS 502-65-8 (lycopene component); EC 207-949-1 (lycopene component)
Use	Professional colour and ingredient formulation development, with a suitably qualified grade for the intended application.
Company	Hainan Zhongxin Chemical Co., Ltd. (ZXCHEM)
Address	Room 1001, Building A, Caohejing Center, No. 1520 Gumei Road, Xuhui District, Shanghai, China
Telephone / email	+86-21-54265599 / sales@zxchem.com.cn
Emergency contact	ZXCHEM office number above, office hours, China time (UTC+8). For urgent medical assistance contact local emergency services.
Scope	Reference safety information for Tomato Lycopene. The reference composition, concentration and supply-grade differences are described in Section 3. This document does not certify the composition or transport status of a specific delivered batch or a different formulation.

2. Hazards Identification

Classification	Reference preparation: skin sensitization Category 1. Combustible dust warning.
Signal word / symbols	Warning; GHS07
Hazard statements	H317: allergic skin reaction in the selected carrier preparation. Dust clouds can ignite; reference allergenic auxiliary ingredients are not certified in supplied powder.
Prevention	Use adequate ventilation; avoid inhaling dust. Prevent skin and eye contact. Wear suitable chemical-resistant gloves and eye protection. Wash after handling; keep food and drink out of the work area.
Response	After exposure, stop work and seek medical advice. For severe exposure obtain urgent medical care. Rinse contaminated skin or eyes with water; move an inhalation casualty to fresh air.
Environment	Prevent uncontrolled release to drains, soil or surface water. Collect spills for appropriate disposal.

3. Composition / Information on Ingredients

Reference ingredient	Tomato-derived lycopene colour preparation, lycopene component CAS 502-65-8. Local lycopene >5%. The carbohydrate/tocopherol carrier formula is reference-only, not the supplied ingredient declaration.
Supply grade	Lycopene >5%
Applicability	The cited concentration or purity describes the reference material. It is not a certificate of analysis for the delivered batch; different solvents or dilutions require the matching supplier safety document.

4. First-Aid Measures

General	Protect the rescuer from exposure and show the product information to medical personnel. Obtain medical advice if symptoms occur or exposure is significant.
Inhalation	Move to fresh air and keep the person comfortable. Seek medical care for breathing difficulty or persistent symptoms. Avoid exposing rescuers to dust.
Skin	Remove contaminated clothing and rinse skin thoroughly with water. Seek medical advice for persistent irritation.
Eyes	Rinse gently with clean water for at least 15 minutes. Remove contact lenses when easy and continue rinsing. Seek medical advice if irritation persists.
Ingestion	Rinse the mouth. Do not induce vomiting. Give nothing by mouth to an unconscious person. Obtain medical advice.
Effects / treatment	Control dust or mist exposure and obtain medical advice after significant exposure or persistent symptoms. Treatment is symptomatic and directed by a clinician.

5. Fire-Fighting Measures

Extinguishing media	Use water spray, foam, dry chemical or carbon dioxide suited to the surrounding fire.
Hazards	Fire or severe heating can release irritating decomposition fumes; use appropriate respiratory protection.
Protection	Firefighters require suitable protective clothing and self-contained breathing equipment. Prevent contaminated firefighting water entering drains.

6. Accidental Release Measures

Personnel	Isolate the spill and provide ventilation. Use chemical-resistant gloves and eye protection; avoid contact and dust exposure.
Environment	Contain the release and protect drains and waterways. Report significant environmental contamination to the responsible authority.
Cleanup	Collect spilled solid without raising dust into closed labelled containers.

7. Handling and Storage

Handling	Use local dust extraction, compatible gloves, clothing and goggles. Control static and ignition sources, avoid skin contact and collect powder residues.
Storage	Store sealed in a dark, dry place. Protect from oxygen, heat, light and moisture; minimize repeated opening and prevent contamination.
Incompatibilities	Strong oxidizing agents; excessive heat, light and oxygen affect product quality.

8. Exposure Controls / Personal Protection

Exposure limits	No product-specific occupational exposure limit is established here. Control airborne dust and apply current local workplace exposure requirements.
Engineering controls	Use local extraction where dust can be generated. Maintain accessible eyewash and emergency washing facilities.
Personal protection	Wear chemical-resistant gloves selected for the task, suitable protective clothing and splash goggles. Add face protection for splash-prone tasks.
Respiratory protection	Use a properly selected respirator under a respiratory-protection program where engineering controls do not adequately limit airborne exposure.
Hygiene	Wash after handling, remove contaminated clothing promptly and do not eat, drink or smoke in the work area.

9. Physical and Chemical Properties

Appearance, supply	Red powder
Lycopene component formula	C40H56
Lycopene component mass	536.87 g/mol
Additional properties	No unstated delivered-grade physicochemical values are inferred.

10. Stability and Reactivity

Stability	Handle and store under the recommended conditions. Prevent contamination and unnecessary heating.
Incompatibilities	Strong oxidizing agents; excessive heat, light and oxygen affect product quality.
Decomposition	Fire or severe heating can release irritating decomposition fumes; use appropriate respiratory protection.

11. Toxicological Information

Exposure effects	Control dust or mist exposure and obtain medical advice after significant exposure or persistent symptoms.
Reference classification	Reference preparation: skin sensitization Category 1. Combustible dust warning.
Toxicological data	The reference preparation identifies skin sensitization associated with its carrier system. Delivery-grade carrier identity and quantitative toxicology are not established; prevent contact.

12. Ecological Information

Environmental effects	Complete supplied-grade aquatic and environmental-fate data are not available. Contain powder, residues and wash water.
Controls	Prevent uncontrolled release, collect spills and dispose of contaminated material through an authorized route.
Assessment	No product-specific PBT/vPvB assessment is claimed. Absence of data does not establish absence of environmental effects.

13. Disposal Considerations

Product	Collect surplus product and contaminated cleanup material for disposal by an authorized chemical-waste contractor in accordance with local requirements.
Packaging	Containers may retain product residues. Do not reuse contaminated packaging without an approved cleaning process; use an authorized disposal route.

14. Transport Information

Classification	Non-dangerous goods
UN number	Not assigned
Shipping name	Not regulated as dangerous goods
Class / packing group	DOT, IMDG and IATA: non-dangerous goods in the full powder-preparation reference. No UN number or transport class assigned.
Transport precautions	Protect packaging and closures from damage, secure loads and prevent releases. This reference is not a shipping declaration for a specific consignment.

15. Regulatory Information

Identity	Tomato Lycopene; CAS 502-65-8 (lycopene component); EC 207-949-1 (lycopene component)
HS reference	320300; reference heading rather than a destination customs ruling.
Compliance	Apply applicable workplace, environmental and transport rules. A raw-material listing does not establish finished-product authorization.
Assessment	No ZXCHEM-specific chemical safety assessment or destination registration is asserted.

16. Other Information

Hazard meanings	H317: allergic skin reaction in the selected carrier preparation. Dust clouds can ignite; reference allergenic auxiliary ingredients are not certified in supplied powder.
Limitations	Prepared as reference safety information for the identified material. It is not a batch analytical certificate or safety assessment of a different solvent-containing formulation.
Revision	2026.4; prepared 2026-10-07. Customer-document branding and title corrected; technical safety data retained.
Document scope	Reference safety information for the material and grade described in Sections 1 and 3. Different concentrations, solvents or formulations require the applicable safety information. This is not a batch analytical certificate.

Revision: 2026.4 | Revision date: 2026-10-07
